

## Concrete Colors

Universal Precast Concrete now operates with state-of-the-art color injection equipment. We no longer order the color admixtures in bags to mix into our concrete batches. This new process is computer-controlled and assures that each batch of colored concrete is the same no matter the number of batches needed.

The benefits to our customers are many:

- We can get an order in the morning and batch and pour it the same day.
- Concrete colors are more uniform over many sequential pours.
- We have the ability to match ANY chosen color from any color supplier.

Concrete Colors can be viewed and chose from any of the following suppliers:

Davis Colors: [www.daviscolors.com](http://www.daviscolors.com)

Colorfull Admixtures: [http://admixtures.home.att.net/color\\_charts/color\\_charts\\_1.htm](http://admixtures.home.att.net/color_charts/color_charts_1.htm)

Scofield Colors: [http://www.scofield.com/coloredconcrete\\_colors.html](http://www.scofield.com/coloredconcrete_colors.html)

Solmon Colors: [http://www.solomoncolors.com/pages/products/cc\\_concrete\\_products.html](http://www.solomoncolors.com/pages/products/cc_concrete_products.html)

We feel this new technology will be a benefit to our customers and allow us to get orders into the production process at a much faster rate.

### **Selecting a Color:**

We recommend the Davis Color website to view large digital color samples and select a desired color and finish:

1. Click on a color from the palette and look for "sample photo" at the upper-right corner of the page.
2. Clicking on the sample photo will bring up a large color picture with a smooth finish.
3. Continue clicking "Next Project" to view examples of broom finish and sandblast finish.

### **Color Pricing:**

On the Davis Colors website, the dollar signs indicate the cost-per-yard. Colors with a single (\$), double (\$\$), and triple (\$\$\$) dollar sign are part of our standard colors. Colors with more than three dollar signs are premium colors and would require an additional charge.

### **Finishes:**

We offer many different finishes for our precast concrete products: Among them: Smooth, Light, medium or heavy sandblast and Acid Etch.
